

Lacing Instructions

GENIALE
SANDALE

1

Put the Geniale Sandale in front of you. Then slip in as in the picture and make sure that the back string is around your heel.

2

Check again whether the free end is wrapped around the heel strap. This prevents it from slipping down.

3

Then wrap the free end of the cord over the front all around your ankle one time.

Now move the end of the string forward towards your toes as shown in the picture.

4

5

Now thread the cord from the top through the front strap and tighten it. The tighter you pull, the tighter the sandal sits on your foot.

6

Now tie a normal knot. Place the free end over the strap on the back of your foot and make a loop.

7

Tighten the knot
- and your sandals are ready!

8

You can cut off the protruding end if necessary and briefly melt it with a lighter to prevent it from fraying.

Enjoy your Geniale Sandale!

Variants

Here are other ways to lace up your sandals.

1

Here the band is wrapped around the ankle only once, instead of twice as shown above.

2

Here you can see the popular Slip-On | Slip-Off variant. This has the advantage that you do not have to open the knot every time and can just slip out.

You can find more inspiration on the website. We look forward to new ideas!

Cutting Instructions

If your sandals are too big you can easily adjust them yourself.

1

The best thing to do is to walk around a little bit to see how much space your feet actually need. Then draw your feet with a pencil with about half a centimeter of buffer.

Cut along the drawn line with sharp scissors - your sandals are adapted to your feet.

2

3

Enjoy your Geniale Sandale!
